**Deliverables**

Instrument: **SP1 Cooperation**

Thematic Priority: **Priority Area 1.1.6.3 "Global Change and Ecosystems"**

**FP7 Collaborative Project – Grant Agreement 212492**

**CLARIS LPB**  
**A Europe-South America Network for Climate Change Assessment and Impact Studies in La Plata Basin**

**DELIVERABLES**

**D2.6: Action plan describing the steps and processes to involve stakeholders in the project**

Due date of deliverable: Month 6

Start date of project: **01/10/2008**

Duration: **4 years**

Organisation name of lead contractor for this deliverable: P1-IRD

Deliverable No	Deliverable title	WP	Lead beneficiary	Estimated indicative person-months (permanent staff)	Nature	Dissemination level	Delivery date
D2.6	Action plan describing the steps and processes to involve stakeholders in the project	WP2	P1-IRD	1,50	R	PU	6

## D2.6 Action plan describing the steps and processes to involve stakeholders in the project

In order to build a transectorial dialogue through which we can formulate the climate change issue as a complex and interdisciplinary matter we have defined the following steps:

Dissemination Stages	WP1 and WP2	WP3, WP4, WP5, WP6	WP7	WP8 y WP9	Stakeholders
<p>1st Stage: 2008-2009</p> <p>From K-O meeting to <i>climate change scenarios</i> presentation for social actors from the agricultural and hydrological sectors.</p>	<p>Coordination of activities and meetings inter WPs; stimulate consortium communication with stakeholders; production of outreach materials for the inter WPs, intraWP and transectorial dimensions (informative bulletin, web site, forum of young scientists, brochure, etc.).</p> <p>Organization of local workshops with stakeholders with the objective of installing the climate change issues in the local social environment.</p>	<p>Production of knowledge about past and future climate that allows us to elaborate the three scenarios of climate change (pessimistic, optimistic, and intermediate).</p>	<p>Production of the computational and simulation tools needed for the activities of WPs 3, 4, 5 and 6, taking into account the needs specified by stakeholders, in the context of WPs 8 and 9 activities.</p>	<p>Field work with agricultural and hydrological sectors to study the producers and institutions types, land use and hydrological resources use.</p> <p>Collaborate on the organization for local workshops with stakeholders; object: "Assessment of climate change social impacts".</p>	<p>Learn and reformulate the knowledge objectives about climate change proposed by CLARIS LPB consortium according to their activity sector.</p>
<p>1st. Summary Workshop of multidisciplinary and Transectorial collaboration.</p>	<p>Coordinate the organization of CLARIS LPB/Stakeholders workshop at a regional level.</p>	<p>Participation in the workshops on the climate change scenarios presentation for stakeholders.</p>		<p>Organization and hosting of the workshop.</p> <p>Presentation of the preliminary results of field work in the selected sites for the study of climate change impact.</p>	<p>Participation in the workshops on the presentation of the needs and interests in CLARIS LPB scientific production, putting emphasis on the way that production is integrated to their activities (productive, social, etc.).</p>
<p>2nd. Stage</p> <p>2010</p> <p>WPs and social actors work based</p>	<p>Coordination of the activities and meetings inter WPs; stimulate consortium communication with stakeholders</p>	<p>Presentation of seminars and debates about climate change scenarios on the sites selected for</p>		<p>Realization of field work (Argentina and Brazil) to study the vulnerability threshold of the</p>	<p>Participation in the study of threshold vulnerability of the different social actors</p>

on climate change scenarios to establish <i>vulnerability thresholds</i> to the change, according to the kind of actor and activity.	incorporating the results of the first stage; produce support materials for the inter WPs, intraWP and transectorial dimensions (informative bulletin, website, young scientists forum, brochure, etc.).	the study of social impact (Argentina and Brazil).		different actors surveyed on the previous stage.  Collaborate on the organization of local Workshops with stakeholders; object: "Vulnerability Thresholds and productive profile".	surveyed on the previous stage.
2010  I International Seminar  "Climate change, social impacts and adaptation strategies"  Time and date to be determined by CLARIS LPB consortium	Organization and coordination of the International Seminar.	Participation in the definition, organization and posting of the International Seminar.			
Beginning of 2011  2nd. Summary Workshop of transectorial and multidisciplinary collaboration.	Coordinate the organization of CLARIS LPB/Stakeholders workshop at a regional level.	Participation in the workshops with the presentation of climate change scenarios to stakeholders.		Organize and host the regional workshop. Presentation of the relation between productive profiles and vulnerability threshold to climate change. Reflexion about the transectorial modality of work implemented by each team in their site of field investigation.	
3rd. Stage  2011-2012  Elaboration with social actors and policy makers of possible <i>adaptation strategies</i> based on the conclusions established on the previous period (vulnerability thresholds).	Coordination of the activities and meetings inter WPs. Stimulate consortium communications with stakeholders incorporating the results of the 1st and 2nd stage. Produce material supports for the inter WPs, intraWP and transectorial dimensions (informative bulletin, website, young scientists forum, brochure, etc.).  Organize local	Presentation of the WP results to stakeholders and regional, national and local institutions: seminars, training talks, workshops.	Create tools on the web site to disseminate CLARIS LPB results in a friendly way.	Realization of field work (Argentina and Brazil) to study the possible adaptation strategies elaborated by researchers together with stakeholders.  Collaborate on the organization of the local workshops with stakeholders; object:	

	Workshops with stakeholders with the aim of doing a joint reflexion, experts and stakeholders, about the adaptation strategies according to the vulnerability thresholds identified on the previous stages.			“Adaptation Strategies and social actors”.	
Regional summary workshop of CLARIS LPB	Coordinate the organization of the regional Workshop.	Participation in the Workshop for the presentation of the final results.		Organize and host the regional Workshop. Presentation of the reflexion work elaborated around the adaptation strategies related to the vulnerability thresholds of actors and institutions. Synthesis of the transectorial modality of work implemented by the CLARIS LPB network.	
End 2012  II International Seminar  “Climate change, social impacts and adaptation strategies”  Time and date to be determined by CLARIS LPB Consortium.	Organization and Coordination of the International Seminar.	Participation in the definition, organization and posting of the International Seminar.
